COLLEGE CHOICE PROCESS

How do I pick a college? What college is right for me?

When picking a college, it is important to consider cost, major, resources, services, type of college, and so much more. Each person will be different and we challenge you to approach the college choice in a way that considers the most important parts of your identity, along with practical questions to uncover what means most to you. Keep in mind that you will have to approach this activity with honesty. These questions can help guide what is important to you in choosing the right college.

College Choice Process in Practice

We asked college students to consider the four main decision areas (family, affordability, belonging, and personal) when deciding on a college. Here is their top college with the questions that meant most to them.

Student #1: Orin from Salt Lake City, Utah
Family: I want to be close to home. I want my mother near me or in the same city.
Affordability: In-state tuition is great. I am afraid of out-of-state costs and moving away. This school has scholarships for Native students for $2,000 per year—this can really help.
Belonging: I want a college that has an American Indian Resource Center on campus. I could make friends there because they remind me of family. Finding other Native students could help me throughout college.
Personal: Tutoring needs to be free and available. This makes me feel more confident about the math classes I plan to take.

College Choice: University of Utah

Student #2: Luna from Missoula, Montana
Family: My family has sweat lodge every Sunday. I need a college close to home so I can attend.
Affordability: This school offers general education requirements for half the cost I would pay elsewhere.
Belonging: Almost 100% of the students are Native and we get to learn about our history and language.
Personal: I can earn my general education requirements and they will transfer into my major.

College Choice: Fort Peck Community College

Student #3: Jessie from Denver, Colorado
Family: It’s important that I come home for the holidays and I can come home if there is an emergency. It is far enough that I can explore my independence.
Affordability: After filling out the FAFSA, I understood that I needed an affordable college. I knew going to college would be my responsibility to pay, not my mom's. This school is affordable and cheaper than CSU, with the same level of education.
Belonging: My high school was mostly white or Latinx. I know my tribe and where I come from, so I wanted to be in a school with more Natives and have a deeper knowledge of other cultures and my own tribe.
Personal: This school offers the general education requirements I need to transfer to Kansas University. Also KU has a partnership with this college so I know my credits will transfer. Tutoring is also included in my tuition. My class size is the same as my high school classes.

College Choice: Haskell Indian Nations University

Student #4: Daisy from Flagstaff, Arizona
Family: I love my family, but I would love to explore beyond my hometown. I want to test my independence and I am okay with only coming home on holidays.
Affordability: This school is very expensive. I will have to create my scholarship plan early to understand my options.
Belonging: The Native people I have met thus far have been great, so welcoming, and I clicked with them right away. They have Native faculty and a center for all students of color.
Personal: I want to major in law, but am willing to explore what other concentrations are out there, like film, literature, and science. This college offers the opportunity to study what I want right away, instead of having to take general requirements.

College Choice: Brown University

HOW TO CHOOSE A COLLEGE

FINDING A MAJOR and DISCOVER YOUR PASSION

Whether you are passionate about helping to heal people in the healthcare field or working in environmental policy for clean water, your passion should be a primary driver in your educational choice.

How do you find that passion? Try answering these EASY questions. This should be something all students consider when thinking about their future, regardless if they decide to go to college or not.

Now consider the HARD questions you have been ignoring or have not been asked. Envision you Auntie/Uncle/teacher is in front of you, asking these questions about your future.

WHAT ARE MY TALENTS?

WHAT AREAS IN MY LIFE DO I WANT TO CHANGE?

WHAT SUPPORT DO I NEED?

WHAT GIVES ME STRENGTH TO FACE CHALLENGES?

WHAT DO I WANT OUT OF LIFE?

WHERE DO I WANT TO BE IN 5 YEARS? HOW ABOUT 10 YEARS?

WHAT AM I PASSIONATE ABOUT?

WHAT AM I GOING TO COLLEGE?

• What motivates you to succeed in life?
• How do you define success in life?
• What do you enjoy doing in your free time?
• Why do you want to go to college and what do you hope to achieve there?
• What do you think will be the biggest challenge when you are in college? What scares you about it?
• If you are accepted into every college you applied to, what factors will help you decide which one to choose from?
• What are your gifts/talents? (example: what comes easy for you?)
• Which class did you most and least enjoy in high school? Why?
• Describe a moment in school when you felt really excited about learning.
• What is one course or area of study you think your little cousins or siblings SHOULD take, and why?
• Tell me about your favorite teacher and how they differ from your other teachers?
• When you imagine yourself on a college campus during your freshman year, what do you see?
• What’s something you’ve never done before that you’d like to try in the future, and why?

These are potential matches for your interest areas.

SPORTS
Sports are an inherent part of Native communities given the culture of Friday night games and three-day long tournaments. This career option can go in many directions. Do you see yourself on the basketball court, coaching, treating injuries, announcing games, coordinating tournaments? Areas of study include: medicine, physical therapy, education, or business.

NURSING
Healthcare is an essential part of Native communities. The path for a registered nurse is rooted in the sciences and can impact people at the emotional and physical level. Potential fields: health-care providers, public health, and community health coordinators.

AMERICAN INDIAN STUDIES
Students often choose to take courses in American Indian Studies to understand issues like education, employment, healthcare, and government in their communities. Potential fields: education, law, government, health, and social work.

- Scandinavian Studies (LS)
- Sociology (LS)
- Spanish (LS)
- World Language Education (ED)

## Certificates

The university offers a variety of certificates (similar to minors) that allow students to earn a concentration of credits in a defined academic field. Students can choose to earn a certificate in addition to their major.

For a full list of majors and certificates available at UW-Madison, visit the Undergraduate Guide at [guide.wisc.edu](http://guide.wisc.edu)
